---

## Summary

**AI Engineer** with hands-on experience building **end-to-end machine learning systems**, including **NLP, computer vision, and multimodal models**, supported by **MLOps and CI/CD automation**.

Industry experience at **AMDOCS** and formal training from **CDAC (PG DAI)**. Strong focus on **production-ready ML**, not just experimentation.

---

## Technical Skills

- **Programming:** Python, Java, SQL, C, C++
  - **AI & ML:** TensorFlow, PyTorch, Keras, Scikit-learn, OpenCV, NLTK
  - **Big Data & Streaming:** Apache Spark (PySpark), Apache Kafka
  - **MLOps & Automation:** Docker, Kubernetes, Jenkins, MLflow, Airflow, DVC
  - **Data & Analytics:** Pandas, NumPy, Matplotlib, Seaborn
  - **Databases:** MySQL, PostgreSQL
  - **Tools & OS:** Git, Linux
- 

## Projects

- **Multimodal Fake News Detection**
  - Built a **multimodal fake news detection system** using **NLP and Computer Vision**.
  - Designed **independent text and image pipelines** for feature extraction and classification.
  - Implemented **late fusion** to combine text- and image-based predictions for final decisions.
  - Structured the solution as a **modular ML pipeline**, evaluated using **standard classification metrics**.
  - *Tech:* **Python, NLP, Computer Vision, Scikit-learn, TensorFlow**
- **Customer Segmentation for Online Retail Using Machine Learning** (*Mar 2023 – May 2023*) [\[Link\]](#)

- Used **K-means and hierarchical clustering** to identify key customer segments based on purchase behavior.
  - Identified **4 key customer segments**, enabling targeted marketing strategies.
  - **Bike Sharing Demand Forecasting Using Machine Learning** (*Jan 2023 – Mar 2023*) [\[Link\]](#)
    - Built demand forecasting models using **Linear Regression, Decision Trees, and LSTM**.
    - Modeled **time-series patterns** to predict daily bike demand for ride-sharing systems.
  - **Predicting Mobile Price Ranges with Machine Learning Models** (*Oct 2022 – Dec 2022*) [\[Link\]](#)
    - Developed classification models using **Random Forest and XGBoost**, achieving **~85% accuracy**.
    - Performed **feature engineering and hyperparameter tuning** to improve model performance.
- 

## Experience

### Software Engineering Associate – AMDOCS (*Oct 2021 – May 2022*)

- Designed and automated **CI/CD pipelines using Jenkins**, reducing deployment time by **40%**.
  - Integrated **non-production and production configuration maps**, improving configuration management.
  - Built **Jenkins jobs** to encrypt sensitive credentials in logs, strengthening **compliance and security**, and supporting **MLOps workflows**.
- 

## Education

- **PG Diploma in Artificial Intelligence (PG DAI) – Centre for Development of Advanced Computing (CDAC), Guwahati**
    - **Completed:** January 2026
    - **Core Coursework:** Fundamental AI, Math for AI, Java, Advanced Python, Data Analytics, **Machine Learning, Deep Learning, NLP & Computer Vision**, AI Compute Platforms
  - **Bachelor of Engineering – Electronics & Telecommunication, D.M.I.E.T.R, Wardha**
    - **Graduated:** 2021 | **CGPA:** 9.7
-
